HACKATHONS & ACHIEVEMENTS

Curcor x Anthropic Hackathon - *Twinkle* **(Cursor x Anthropic)**

Top 15 Finalist

- Built a 3D educational game for children with ADHD using task-based, visual-spatial learning.
- Focused on improving attention control and engagement through interactive gameplay.

DEVMatch 2025 - *Ethclbet* **(APU Blockchain Club)**

Winner - Ethereum Foundation: Best Tooling for Prediction Market | 2nd Place – The Graph | Participant Reward – Oasis

- Built a prediction-market aggregator with smart contracts and secure identity integration.
- Optimized allocation and tracking using decentralized data and LLM-assisted logic.

EthOnline 2025 - *IntelliTrade* **(EthGlobal)**

Winner - Lighthouse Prize: Best Data Agent Created

- Developed an AI-driven data agent for decentralized data discovery and analytics.
- Enabled secure, cross-chain data access using token gating and verification protocols.

Tech Trove 2.0 – *IntelliBox* **(Taylor's Cyber Circuit Club)**

1st Prize

- Built a multi-agent automation platform that connects AI agents to perform tasks end-to-end.
- Demonstrated automated proposal, slide, and email generation through API-linked agents and LLM integration.

EDUCATION

Bachelor of Computer Science (Specialization in Artificial Intelligence) **Sept 2023 - Present**
Taylor's University | CGPA: 3.76 (Current)

- Received Dean's List Award: Sept 2023, Feb 2024, Apr 2024, Sept 2024, Feb 2025, Apr 2025, Sept 2025

Foundation in Computing **Aug 2022 - Aug 2023**
Taylor's College | CGPA: 3.70

- Recipient of Taylor's College Top Achiever Award
- Received Dean's List Award: Aug 2022., Jan 2023, Apr 2023

PROJECTS

DOPEWS-MY - Dengue Outbreak Prediction & Early-Warning System

Designed and developed a full-stack system with multi-horizon dengue forecasting, interpretable risk scoring, and geospatial dashboards for decision support.

FoodBridge - Food Waste Reduction Platform

Built a full-stack web platform connecting surplus food providers with communities in need using modern web technologies.

Taylor's Room Booking System

Developed a web-based room booking platform for Taylor's University that enables users to view room availability, make reservations, and manage bookings in real time, improving space utilization and reducing manual scheduling.

SKILLS

- Programming Languages: Python, Java, JavaScript
- Web Development: HTML5, CSS, React, Next.js, PHP, MongoDB, MySQL
- Machine Learning: TensorFlow, Random Forest, KNN
- Design and Creative Tools: Canva, Figma, Video Editing
- Languages: English, Chinese, Malay, Cantonese
- Core Competencies: Teamwork, Communication, Leadership, Problem Solving, Time Management
